ESG Factors Applied in the Benchmark Methodology

List of environmental factors considered	> Selection of the index components takes into account a scoring which is among other things based on the 26 SASB categories (Sustainability Accounting Standards Board). The top 200 stocks according to this score are eligible for the index
List of social factors considered	> Selection of the index components takes into account a scoring which is among other things based on the 26 SASB categories (Sustainability Accounting Standards Board). The top 200 stocks according to this score are eligible for the index
List of governance factors considered	> Selection of the index components takes into account a scoring which is among other things based on the 26 SASB categories (Sustainability Accounting Standards Board). The top 200 stocks according to this score are eligible for the index.

Data and Standards used

Data Input	The data used to construct the index is sourced externally from FactSet Research Systems Inc.
Verification and quality of data	The provider of ESG-related data input is selected by the Administrator based on an assessment of its existing processes in order to ensure the reliability and representativeness of the ESG-related data. The data provider has established processes in accordance with accepted and established market standards that ensure the permanent quality and reliability of the ESG-data provided.
Reference standards	International standards referenced by the index methodology are listed in the respective section above.
Information updated on	19/12/2025
Reason for update:	Initial document creation.
