List of governance factors considered	> Exclusion of any companies that fail to comply with the governance-related principles of the United Nations Global Compact.

Data and Standards used

Data Input	The data used to construct the index is sourced externally from ISS ESG
-------------------	---

Verification and quality of data	The provider of ESG-related data input is selected by the Administrator based on an assessment of its existing processes in order to ensure the reliability and representativeness of the ESG-related data. The data provider has established processes in accordance with accepted and established market standards that ensure the permanent quality and reliability of the ESG-data provided.
Reference standards	International standards referenced by the index methodology are listed in the respective section above.
Information updated on	29/06/2026
Reason for update:	Initial document creation.
