

FACTSHEET - AS OF 07-Apr-2026

Solactive VK Globale Aktien 12% Risikokontrolle

DESCRIPTION

The index aims to track the global equity market including only companies without Global Compact violations as well as companies not involved in certain business activities. Furthermore, the weights are chosen in the optimization process in such a way that the final index has a lower carbon intensity, better average ESG rating, less environmental orange flags and more weight in securities that have set Science Based Targets than the benchmark, as well as a minimum cumulative weight in sustainable securities and EU Taxonomy-aligned securities. The index applies a risk control layer on top. For more information about the index, see [Solactive | Indices](#).
