

DESCRIPTION

The Solactive Municipal Infrastructure Revenue Bond Index is a rules-based, market value weighted total return index engineered for the tax-exempt bond market. The index is designed to track the U.S. long term tax-exempt bond market. The index is intended to track bonds that have been issued with the intention of funding federal, state and local infrastructure projects such as water and sewer systems, public power systems, toll roads, bridges, tunnels, and many other public use projects. The index is comprised of tax-exempt municipal securities issued by states, cities, counties, districts, their respective agencies and other tax-exempt issuers. The index will attempt to only hold those bonds issued by state and local municipalities where the interest and principal repayments are generated from pledged revenues.

Each index component that collectively accounts for at least 80% of the index's total weight must have a minimum original principal amount outstanding of 100 million USD. The index employs a modified market cap weighting methodology, with a cap of 5% per issuer.
