

FACTSHEET - AS OF 07-Apr-2026

Solactive LGIM ESG Japan All Cap Equities Index TR

DESCRIPTION

The index is designed by first screening the parent index (Solactive GBS Japan All Cap Index) to only incorporate companies that do not have excessive exposure or involvement in manufacturing of controversial weapons, pure coal mining or are persistent violators of the UN Global Compact. The screened universe is then tilted in order to increase the exposure to companies with higher L&G ESG scores, while maintaining sector and country neutrality in relation to the parent index.
